

D205

112 MM THERMAL PRINTER WITH 3U PLASTIC CASE

The D205 printer is based on the MEPL-7500 printers family. The software was modified in order to become compatible with the touch-sensitive screens MMI850 and MMI1500 from KEP in "SP Printer" mode.

A 24V thermal printing head is integrated and a paper reserve takes place in a black injected plastic case. This OEM case can be panel mounted with 4 screws or in a 3U rack (standard dimensions 129 x 177,5 mm). The corresponding electronic is in the back. This compact printer is very easy to integrate and implement.

The many functionalities included in the interface management program and the high resolution (8 dots / mm) enable curves and bar code graphic printing with very good quality and many special effects.

24V LINE THERMAL PRINTER

- Touch-sensitive screen MMI850 print out
- Thermal printing system
- 112 mm paper width
- 24 VDC power supply
- Parallel interface
- Compact Design 3U 129 x 177,5 mm

CHARACTERISTICS

- Power supply warning light
- Automatic paper load
- 2 characters fonts 16x24 et 10x24

- Bar code : Code 39, ITF 2/5, Codabar
- Graphic line by line
- Many functions : underline, margin, stretch, turnaround...

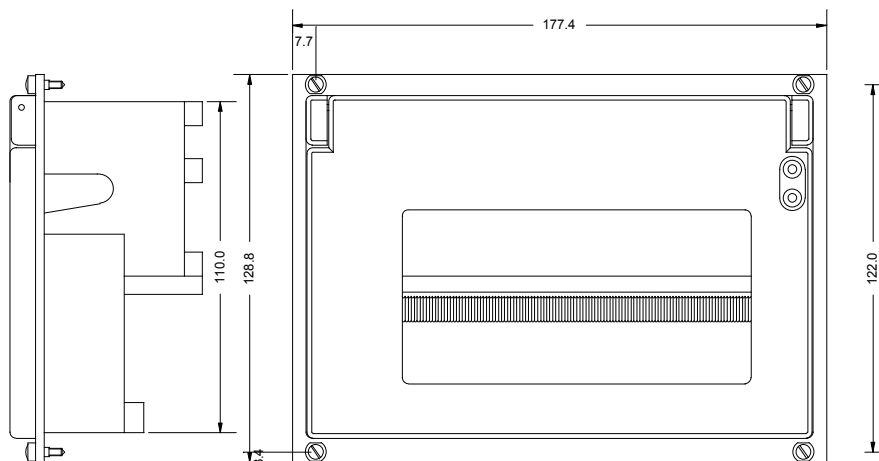

CONSUMABLES

Part number

- Simple paper thickness MPA-TH-112-50-1

Control interface
ITP-1703
